EXPERIENCE ——————————————————————————————————————

SOFTWARE DEVELOPER LEAD & TECHNICAL PROJECT MANAGER
HALL CAPITAL PARTNERS LLC   Jan 2021 - Present

- As the primary project manager of AI internal tools development, I managed a team of 6 through the development of a cognitive search and chatbot application, leveraging our own ChatGPT Azure tenet
- Led full-stack development and managed production support of a client portfolio dashboard application with a program team of 7 engineers, a design team, and non-technical business analysts, increasing the frequency of client data delivery from monthly manual updates to daily on-demand access
- As project lead, I developed and managed the project roadmap and designed new feature specs for an internal inbox application, working cross-functionally with 2 non-technical teams, and interfacing with managing directors of the investment operations and business intelligence teams
- As a full-stack software engineer, I have contributed to or led the development of web applications, led weekly technical brainstorming and demo sessions, refined product specifications, and held daily engineering standups
- Piloted the transition to cloud services from an exclusive on-premise infrastructure, and formally presented a team-wide training session on Azure pipelines and troubleshooting
- Managed and developed an email security application that automated document-saving and forwarding, increasing the efficiency of incoming investment-related email communication by 5x

CONTRACT SOFTWARE DEVELOPER
PREAPP CO., LTD   Nov 2020 - Jan 2021

- Led the design and development of an inventory tracker to support entering the Japanese sweets and confectionery market, working cross-culturally with an international engineering team based in Yokohama, Japan
- Planned and managed a multi-month roadmap for team-wide adoption of Git workflow best practices, using Atlassian's JIRA and BitBucket

PROGRAM DEVELOPMENT LEAD & PROJECT MANAGER
ENACTUS @ PEARSON COLLEGE LONDON   Oct 2018 - Jan 2020

- Spearheaded the launch of a recycled outerwear campaign with a team of 10, initiating and planning a 9-month program roadmap, and managing leadership buy-in and partner relationships (i.e. Pearson)
- As Head of Student Projects, I managed the recruitment and placement of 60 students in 7 student-led startups and led weekly training and mentorship events
- Awarded nation-wide recognition as the best UK-based Rookie Enactus team of 2019
